# AdjuTec™

## DRT Plus

**Unsurpassed drift control.**

**Enhanced spray droplet retention on leaf surfaces while minimizing runoff.**

**Unparalleled reduction of fine droplets.**

### Principal Functioning Agents

- ↳ Modified vegetable oil, paraffinic hydrocarbons, fatty acids . . . . . 99.7%
- ↳ Inert Ingredients . . . . . 0.3%

AdjuTec™ DRT Plus is a deposition aid/drift control agent that improves the droplet spectrum of spray solutions without altering the viscosity of the solution. The percentage of fine droplets, which are the most susceptible to drift, is significantly reduced, thereby increasing deposition and reducing drift of the spray away from the target. Spray spectrum will be more consistent and droplets will be closer to optimum size. AdjuTec™ DRT Plus increases spray droplet retention on leaf surfaces while minimizing “bounce” and runoff.

### Application Directions

- ↳ The use rate for AdjuTec DRT Plus is 2-6 oz/A.
- ↳ AdjuTec DRT Plus may be used with any herbicide that requires, recommends or allows the use of a deposition aid and/or drift control agent. Use rates for best results to minimize drift are 4-6 oz/A. AdjuTec DRT Plus may also be used with insecticides and fungicides to improve droplet deposition and coverage throughout the plant canopy. Rates used specifically for improving deposition characteristics are 2-4 oz/A.

### Package Size

- ↳ 2x2.5 gal
- ↳ 265 gal

### Minimum Storage Temperature

- ↳ No Temperature Restriction
