# AdjuTec™

## ZEPHYR PRIME

**Low use rate replacement for oil adjuvants and surfactants.**

**AdjuTec™ ZEPHYR PRIME is a patent pending surfactant which improves the deposition and penetration of active ingredients into target plants while improving rainfastness and wash-off resistance.**

### Principal Functioning Agents

↳ A proprietary blend of polyalkoxy ethers of phospho (-azoethyl and -inosityl) diglyceryl esters, fatty acids and nonionic surfactant . . . 100%

AdjuTec ZEPHYR PRIME is designed for use with herbicides, fungicides, insecticides, defoliant, desiccants, plant growth regulators, and any other crop protection product where an oil concentrate, nonionic surfactant and/or improved deposition is required or recommended.

AdjuTec ZEPHYR PRIME provides the convenience and simplicity of a low use rate replacement for many oil concentrates that are typically used at 2-4 times the use rate of AdjuTec ZEPHYR PRIME.

AdjuTec ZEPHYR PRIME does not contain ammonium sulfate or acidify the spray solution and is compatible with a wide array herbicides including those that contain glyphosate, dicamba, 2,4-D and many others. Humidome trials with AdjuTec ZEPHYR PRIME have demonstrated minimal or no impact on increased pesticide volatility and wind tunnel trials with AdjuTec ZEPHYR PRIME have demonstrated reduced fine droplet formation from most pesticide spray solutions.

### Application Directions

#### ↳ Ground Application

For pesticides where an oil concentrate is recommended: 1 qt/100 gal of spray solution

#### ↳ Air Application

For pesticides where an oil concentrate is recommended: 4-6 oz/acre  
- Refer to pesticide label for minimum water volume/acre  
- Always read and follow label directions.

### Package Size

- ↳ 2x2.5 gal
- ↳ 265 gal

### Minimum Storage Temperature

- ↳ 25°F
