AdjuTec® Simul

All-in-one adjuvant.

Unparalleled low use rate.

Ensures on-target application, mitigating risk for your ease of mind.

Principal Functioning Agents

- ↳ Water conditioners, surfactants, defoamer, drift management agents, and inert ingredients. 100%

PCT | Sunrise® AdjuTec® Simul is the industry's most advanced adjuvant system combining nonionic surfactants, water conditioning agents, deposition and drift management aids and defoamer.

AdjuTec Simul is a unique, low-viscosity, all-in-one adjuvant possessing cutting-edge features and an unparalleled use rate, that provides unmatched convenience and simplicity for its users.

AdjuTec Simul can be used with a wide range of pesticide spray mixtures when accompanying labels recommend surfactants, water conditioners and deposition aids and drift control agents.

AdjuTec Simul does not contain ammonium sulfate or acidify the spray solution and is compatible with a wide array of herbicides including those that contain glyphosate, low-volatility dicamba (i.e. Engenia), low-volatility 2,4-D (i.e. Enlist One) and many others.

Application Directions

- ↳ Typical use rate is 2 qt/100 gal of water
- ↳ Approved pesticide tank mix partner at labeled use rate with the low-volatility 2,4-D technology
- ↳ Consult pesticide labels for product use rates, instructions and proper mixing order
- ↳ Drift Reduction Agent must be added when tank mixing with low-volatility dicamba programs (i.e. Engenia) as per the label
- ↳ No additional adjuvants are needed when mixing with low-volatility 2,4-D programs (i.e. Enlist One) as per company requirements

Package Size

- ↳ 2x2.5 gal
- ↳ 265 gal
- ↳ Bulk

Minimum Storage Temperature

- ↳ For optimal storage, store between 40°F and 90°F
