

FolrFeed®

Corn Foliar LITE II

PCT | Sunrise® FolrFeed® Corn Foliar LITE II provides foliar-fed nutrients and additional disease resistance just as your corn crop is establishing the number of rows on each ear and ultimately, your potential for a high yield.

The N-P-K in Corn Foliar LITE II supplies nitrogen and phosphorous fertilization to promote continued root development and sufficient energy transfer in the plant, while the potassium strengthens cell walls to reduce lodging and aid in water retention when dry conditions hit.

Corn Foliar LITE II contains plant growth regulators that promote larger leaves and photosynthesis – the production of energy that fuels grain development. An added phosphite in Corn Foliar LITE II stimulates the plant's immune system and protects it before disease hits.

Micronutrients manganese, boron and zinc supply additional nourishment to improve overall plant development and health. Manganese activates plant enzymes and chlorophyll production. Boron supports the transfer of nutrients from the leaves to ears and in the formation of tassels and silk, while zinc promotes continued root development.

In addition to plant nutrient benefits, Corn Foliar LITE II is compatible with other crop protection products, minimizing trips across the field. The product can be mixed in any order with other products, providing you simple application.

The PCT | Sunrise team of agronomists and chemists continually research, test and formulate their own precise blends to ensure current nutrient needs are being met. Using FolrFeed® Corn Foliar LITE II with your plant nutrient program is one step in creating an all-encompassing method to get more from your fields.

Corn Foliar LITE II Traits

Boron

- ↳ Supports nutrient transfer throughout the plant; tassel and silk formation

Manganese

- ↳ Supports plant photosynthesis, improving overall plant growth and health

Zinc

- ↳ Provides continued strong root development

N-P-K

- ↳ Strengthens cell walls for an overall healthier, more productive plant

Auxin, cytokinin and gibberellin

- ↳ Plant growth regulators that promote root branching, cell division and leaf expansion

Added phosphite

- ↳ Stimulates plant immune system to protect it before disease hits

Added sugars

- ↳ Improve nutrient uptake

Corn Foliar LITE II | Key Ingredients

Nitrogen	8%
Phosphorus	5%
Potassium	5%
Manganese	0.25%
Boron	0.52%
Zinc	1.04%

Usage Rates

↳ 1 g/acre

Plant growth regulators can be added.

Product Stage Applied
