

StandUp® Base Corn Starter

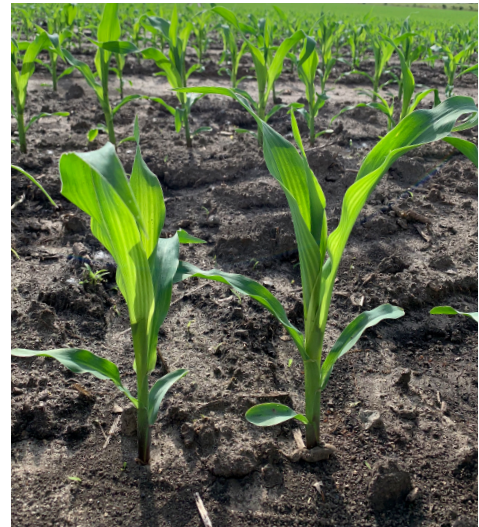

PCT | Sunrise® StandUp® Base Corn Starter is an economical starter product to boost corn crop in fields that already have favorable conditions for phosphorus availability. It contains 80 percent orthophosphorus – while this is less than our premium product, StandUp Premium P Corn Starter, at 95 percent orthophosphorus, – it is appropriate for soils with high phosphorus soil test, low compaction and good drainage.

The key to both PCT | Sunrise starter products is its orthophosphorus – phosphorus that is immediately available to your plant, unlike polyphosphorus that needs hydration and time to break down before it takes action. Orthophosphorus accelerates seed germination, quickens emergence and improves plant development to help maximize yield potential.

To further ensure your crop gets off to a healthy start add StandUp Corn Micro Pack to your starter application. Our Corn Micro Pack contains plant growth promoting rhizobacteria that enhance germination and root development; micronutrients zinc, manganese and boron that activate plant enzymes; and a phosphite that provides increased fungicidal properties to stimulate the plant's immune system.

The PCT | Sunrise team of agronomists and chemists continually research, test and create their own precise blends to ensure current nutrient needs are being met. The PCT | Sunrise planter conversion team also will outfit your planter to ensure the StandUp Base Corn Starter is on target to immediately feed your seed.

Base Corn Starter Traits

Orthophosphate

- ↳ Phosphorus that is immediately available to plant

Compatible and economical

- ↳ Can be used with in-furrow insecticides and Corn Micro Pack

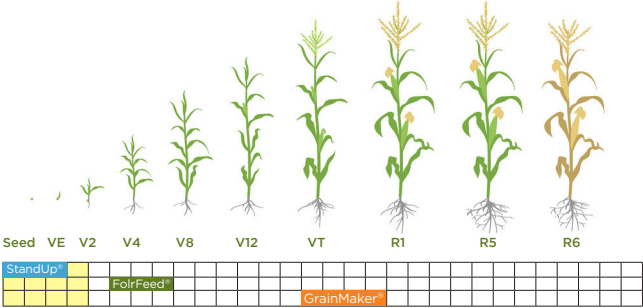

Base Corn Starter | Key Ingredients

Nitrogen	6%
Phosphorus	18%
Potassium	6%

Usage Rates:

→ 3-5 g/acre
Plant growth regulators can be added.

Product Stage Applied

	Economical, N-P-K base with reduced P and Nutrol, 80% orthophosphorus	Micronutrients, plant health boosters, germination and growth stimulators, beneficial microbes	Lower salt, N-P-K base with 95% orthophosphorus, Nutrol to boost plant health	SeasonMax technology to protect phosphorus against soil tie-up
