

# FolrFeed® Veggie Foliar

PCT | Sunrise® FolrFeed® Veggie Foliar is designed for application from vegetative stages through flowering and fruit set to support leaf expansion, photosynthesis, reproductive growth, plant health and more consistent produce size.

Veggie Foliar provides balanced amounts of key nutrients, including nitrogen, phosphorus, potassium, magnesium, calcium, boron, manganese, and zinc. These nutrients boost plant chlorophyll and photosynthesis, flower production, fruit set and protein movement to the produce improving size and quality.

Plant growth promoting rhizobacteria may reduce root die-back and protein competition between produce that can lead to inconsistent vegetable size.

Veggie Foliar contains four compounds (formic acid, salicylic acid, phosphite and monopotassium phosphate) to stimulate the plant's natural defenses against disease. When applied regularly, these compounds can reduce injury from downy mildew and other leaf diseases.

Essential amino acids (building blocks of protein) are present under stressful conditions, including drift of certain herbicides. Included amino acids are readily soluble and in the proper forms for plant uptake and use.

Beneficial biostimulants promote biological health on the leaf surface and into the soil environment. These microorganisms can compete with and limit establishment of leaf pathogens. They also can translocate within the plant or from directed spray to the soil, building root mass.

Nutrients in Veggie Foliar are formulated for maximum compatibility with crop protection products or other biostimulant products like PCT | Sunrise BioBuild® C-Green Amino+ II. No special mix order is required.

## Veggie Foliar Traits

Compatible and Economical

- ↳ balanced nutrition supports photosynthesis, produce set and protein content
- ↳ compatible with most herbicides, fungicides and insecticides
- ↳ nutrients and plant growth promoting rhizobacteria encourage more even fruit development
- ↳ multiple ingredients promote plants' natural defenses against leaf pathogens
- ↳ amino acids and beneficial microorganisms provide added layers of defense against stress and pathogens

## Veggie Foliar | Key Ingredients

Total Nitrogen	7.8%
Available Phosphate (P <sub>2</sub> O <sub>5</sub> )	12.5%
Potassium	8.03%
Calcium	0.05%
Magnesium	0.05%
Boron	0.2%
Manganese	0.2%
Zinc	0.2%

## Usage Rates

- ↳ 2 gal/acre
  - Do not apply if air temperature is greater than 85°F or in noonday sun.
