GENERAL INFORMATION

PCT | Sunrise BioBuild™ BioZolve is a natural microbial inoculant that contains over twenty strains of beneficial microorganisms with no added chemicals, enzymes or surfactants. BioZolve's beneficial microbes work to dissolve organic solids in multiple environments, reducing organic waste and associated odors. BioZolve reduces pump-out frequency of septic tanks and grease traps by augmenting the breakdown of starches, proteins and cellulose and liquefying fats, oils and grease. BioZolve degrades muck and sludge build-up in ponds, improving water clarity and dissolved oxygen levels.
