GENERAL INFORMATION

PCT | Sunrise® FolrFeed Aerial Foliar is a lower-salt liquid nitrogen fertilizer with boron, zinc, sulfates, enzymes and sugar. Boron supports sugar movement, disease resistance and pollination. The proprietary biodegradable zinc chelate allows for rapid uptake to the plant. Sugar helps as a humectant getting the fungicide and nutrients stuck to the leaf and works as an energy boost to the crop to help reduce stress. Chitosan, proprietary organics and enzymes help mitigate growth therefore productivity of the plant.
