WARNING

GENERAL INFORMATION

PCT | Sunrise FolrFeed® Soy Foliar BAM II is a liquid foliar fertilizer with boron and manganese, designed to maintain rapid vegetative growth while promoting stem branching and flower development. Boron supports sugar movement while manganese activates enzymes activation and synthesizes chlorophyll. Plant growth regulators may be added to FolrFeed® Soy Foliar BAM II to promote branching and flower retention. Manganese is dual-chelated for maximum protection against tie-up and incompatibility with other tank ingredients (herbicides, insecticides, etc.)
