GENERAL INFORMATION

PCT | Sunrise StandUp™ Premium Soy Starter w/MIC is a liquid plant-nutrient mixture of nitrogen, phosphorus and potassium with micronutrients, and beneficial microorganisms. StandUp™ Premium Soy Starter w/MIC has a low salt index that allows in-furrow placement for faster root interception. High orthophosphorus immediately feeds plants without delays associated with polyphosphorus fertilizers. EDTA- and IDS-chelated manganese is protected against chemical tie-up by other soil elements. Monopotassium phosphate and phosphites in StandUp™ Premium Soy Starter w/MIC may also stimulate the immune system of plants and support greater plant resistance to pathogenic fungi. Beneficial microorganisms in StandUp™ Premium Soy Starter w/MIC improve root health and nutrient uptake.
